D2S

getitpure®

Lipolysis & Contouring Solution (10ml*5vial/box)

Optimal Combination for maximum effect of Lipolysis

- ✓ Optimized ratio of key ingredients to support fat breakdown.
- ✓ Improves fibrous tissue elasticity.
- ✓ Helps improve the appearance of cellulite and supports overall body contouring.

Who is it good for?

People who want to reduce fat in local areas : Those who want to reduce fat in specific areas such as belly fat, thighs, and forearms.

getitpure®

D2S | D2S Core Ingredient

✓ GPC (Glycerophosphocholine)

- This key ingredient destroys fat cells and is excreted through urine and sweat.
- GPC is a new fat-dissolving agent that improves the safety of PPC by stimulating fibroblasts to regenerate connective tissue, helping maintain skin elasticity after fat reduction.

✓ DC (Sodium Deoxycholate)

- Sodium deoxycholate, which has been recognized for its efficacy and safety through numerous clinical trials, directly destroys and decomposes fat cells themselves to reduce the size of fat cells as well as reduce the number of fat cells underneath to obtain permanent effects.

✓ Thioctic Acid

- Thioctic Acid can improve skin health by reducing signs of aging and promoting collagen production.

✓ Carnitine

- Carnitine reduce adipocyte lipid concentration and prevents cellulite formation.

✓ Bromelain

- Bromelain works in a similar way to enzymes in a gastric juice, enhancing the metabolism.
